

G+

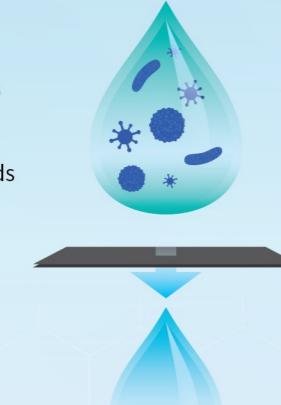

DO YOU KNOW WHAT YOU' RE DRINKING EVERY DAY?

Water is an essential element in our lives, accounting for about 50-70% of body weight. It is not only the foundation of life but also responsible for regulating body temperature, transporting nutrients and oxygen, eliminating waste, lubricating joints, and protecting sensitive tissues.

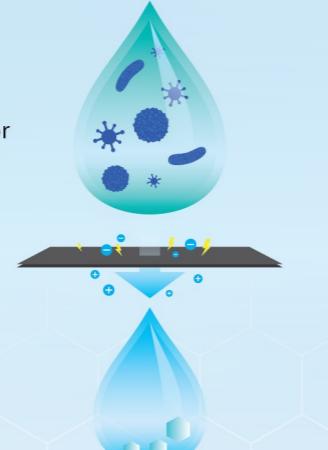

Ultrafiltration Technology

Reverse Osmosis RO Technology

G+ Nanofiltration Technology

Scale buildup and insufficient filtration

Over-filtration fails to retain beneficial minerals

8 VITAL MINERALS FOR HEALTHY BODY

Calcium (Ca)

- Supports bone health, muscle function, and nerve signaling

Magnesium (Mg)

- Aids in energy production, muscle contractions, and regulate blood pressure

Potassium (K)

- Helps maintain fluid balance, supports heart, muscle and nerve function

Sodium (Na)

- Essential for fluid balance and proper muscle and nerve function

Zinc (Zn)

- Boosts the immune system, supports wound healing

Selenium (Se)

- Acts as an antioxidant, supports metabolism

Strontium (Sr)

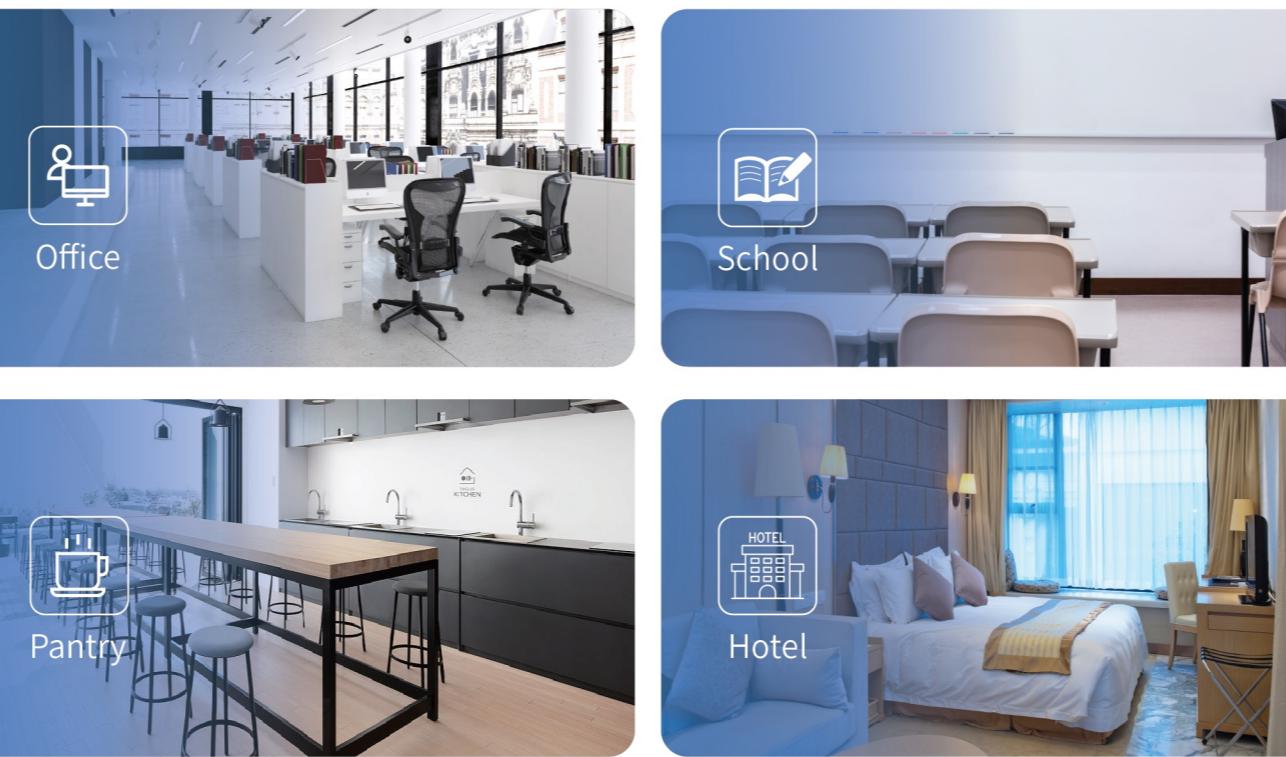

- Help increase bone mineral density

Silicic Acid (H₂SiO₃)

- Stimulating collagen production

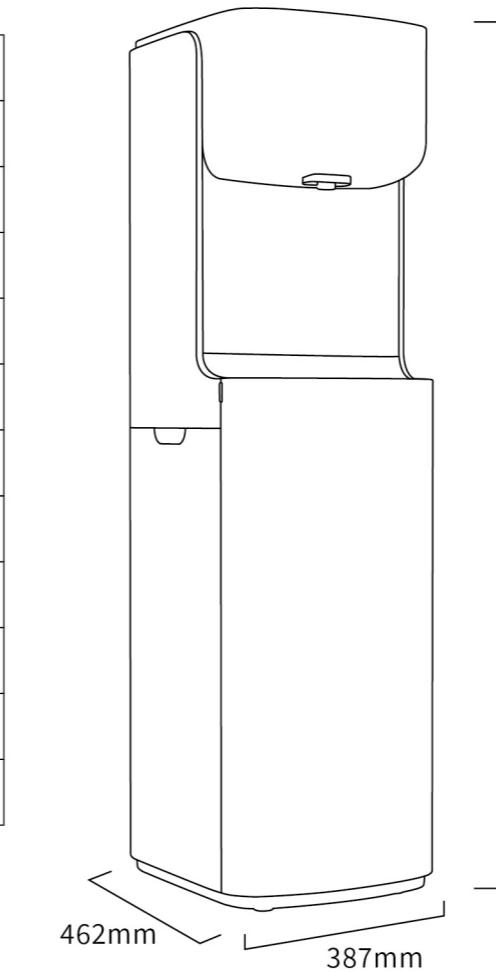

NECESSITY FOR DIFFERENT PREMISES

SPECIFICATIONS

Model	FSD20T4RTG
Dimensions (H x D x W)	1385 x 462 x 387 mm
Filtration Type	NF / RO
Filter Configuration	3 Filters (PCFF+NF/RO+CTO)
Rated Voltage / Frequency	220 ~ 240V / 50Hz
Water Temperature ¹	Hot: ≥90°C Cold: ≤10°C
Water Tank Capacity	Ambient: 8L Hot: 5L Cold: 4L
Rated Power	Cooling:150W Heating:1500W
Water Leakage Protector	YES

Precautions:
 1. Actual water temperature and life of filter may vary according to usage environment.
 2. Filtered water has been verified by SGS to meet drinking water standards, test report HKE25-C20680_002

Freestanding Water Dispenser

FSD20T4RTG

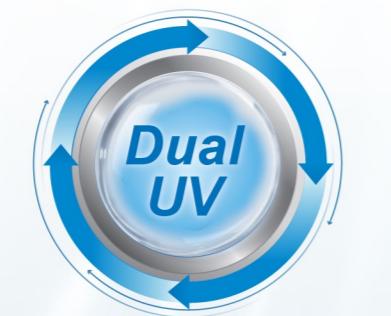

GE is a trademark of General Electric Company and is manufactured under license by General Water Technology (Hong Kong) Co., Ltd.

SAFETY

Innovative Dual-UV Technology

Dual UV Technology ensures purity of every sip

① Submerged UV in Water Tank

② Flow-Through UV at Water Outlet

EFFICIENCY

G+fizz® Instant Aeration Technology with Efficient Cooling Capacity

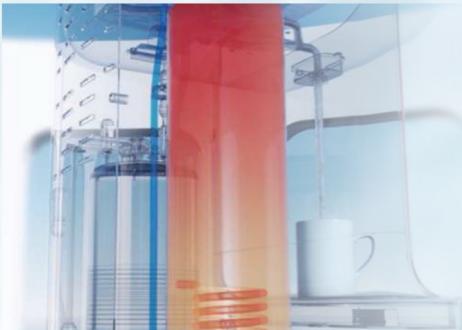

Instant Aeration System

Efficient Compressor Cooling

Instant Sparkling Water

Special Structural Design Providing Faster Heating Speed

Hot
≥90°C

Room temperature
5-38°C

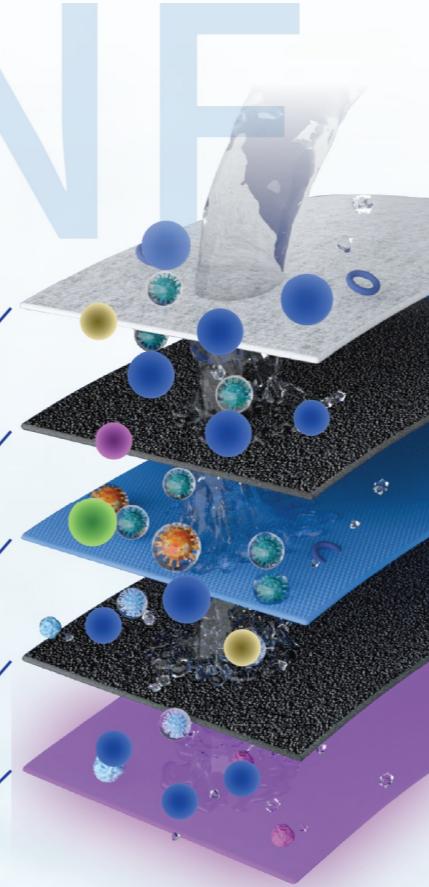

Cold
≤10°C

Sparkling
≤10°C

HEALTH & WELLNESS

6-Stage of Nano Filtration System

G+ Patented Filtration Technology Effectively Filters Harmful Materials Preserving 8 Benefits Minerals, Provide You with Healthier Water Supply

Stage 1

Polypropylene Cotton

Pre-filtration filtering out silt, suspended solids, rust, etc

Stage 2

Compressed Activated Carbon

Effectively adsorb harmful substances such as organic compounds and heavy metals

Stage 3

Nano Filtration Membrane

Remove harmful substances such as bacteria and viruses, meanwhile retains 8 essential minerals

Stage 4

Compressed Activated Carbon

Absorb colors and odors and provide better taste

Stage 5 & 6

Dual-UV Sterilization

Ultimate protection to ensure the safety of every drop

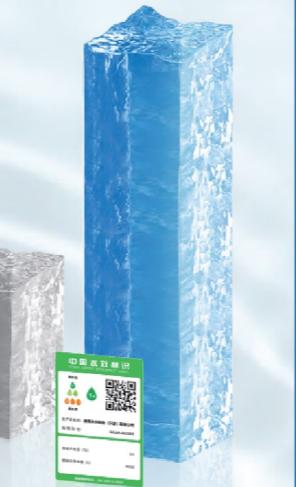

We Provide RO Filtration System Option to Fit Different Customer Need

*NF test report number: ASH20-005685-01
*RO test report number: ASH20-030899-01

SUSTAINABILITY

High-Efficiency Water-Saving Design with Water Purification Rate

65%

Reduce plastic consumption and save 6 tons of carbon emissions yearly by choosing water dispensers over bottled water

Annual Carbon Emissions

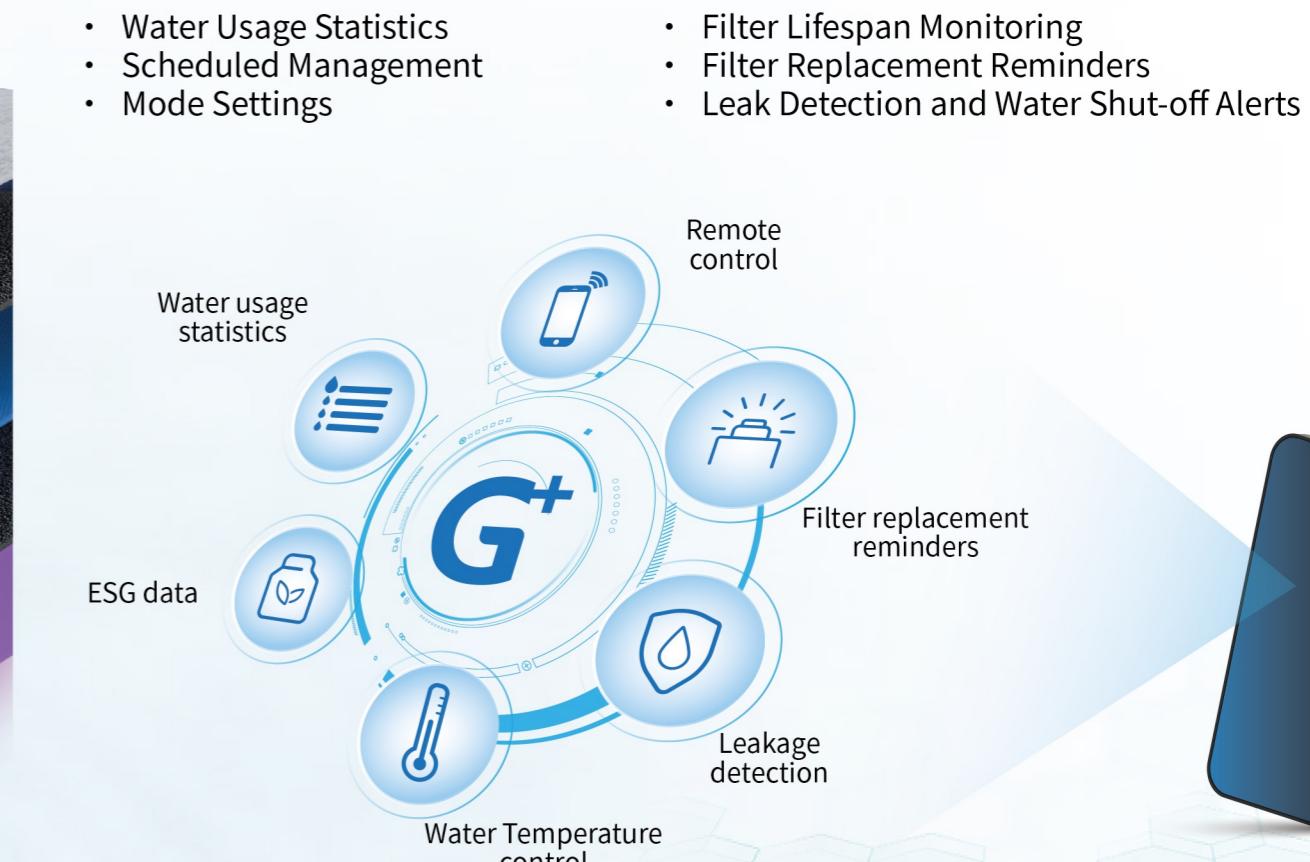

*GWT data based on a 5L FSD20 model; actual carbon reduction depends on the actual water usage of each unit.

G+ SMART IOT

IoT-Enabled Purification with G+ Smart Platform

- Water Usage Statistics
- Scheduled Management
- Mode Settings

EASY OPERATION

Simple and Clear LED Ensures Easy Operation
